

Mystic Spray Tan Preparation

- For best results... to be done on freshly exfoliated, cleaned, unlotioned and non-perfumed skin
- Keep your skin moisturized daily, but do not apply oil or moisturizer before your spray tan (dry skin creates uneven results, oil and moisturizer create a barrier)
- Exfoliating is very important to achieve an even tan, best if done the day before
- Shave at least 8 hours before session, waxing 1-2 days before
- Remove make-up.

Use MYSTIC TAN BOOSTER (available in packet or bottle)

- Helps achieve darker results
- Increases the longevity of the tan
- Moisturizes your skin
- Colors will show up 1-2 hours after session instead of 4-6
- Your tan will be more even.

Before You Tan...

- Apply blending cream on hands, feet, elbows and knees
- Remove all articles of clothing, including jewelry
- Cover hair behind the hairline leaving ears exposed.

After Your Mystic Tan...

- Remove blending cream using a paper towel
- Remove hair cap using a paper towel
- Air dry in front of the fan, using a towel will not ruin your tan
- Do not shower for a minimum of 4-6 hours. Before your first shower...
 - Do not exercise or engage in sweating activities
 - No moisturizer or perfume
 - Do not exfoliate (at least 48 hours after application).

Tips To Extend Your Tan...

- After your first shower, moisturize daily
- Use MYSTIC TAN BRONZER daily to extend your tan.

Remember...

- The skin begins to darken approximately 4 hours after application and reaches its peak after 24 hours
- The tan lasts from 4 to 7 days
- Spray tan does not protect against UV rays, use sunscreen (water based) before sun exposure!
